

*Bullimina*. Three genera of Diatoms and three genera of Radiolarians were observed as well as one small gastropod.

Figure 1

*Bathybembix bairdi* (DALL, 1889)

Uncinus; Central Tooth; First, Second, and Third Laterals. Note: The third lateral has been rotated 50° to show the bar on the stem which in the intact radula fits into the slot on the base of the second lateral. The blades are very flexible and may assume various positions.

## Type Locality Designation for *Dirona aurantia* HURST, 1966

ANNE HURST

Zoology Department, University of Reading  
Reading, Berkshire, U. K.

THE ORIGINAL DESCRIPTION of *Dirona aurantia* HURST, 1966 was made from a collection of specimens pooled from three localities. The type specimen was chosen from these not knowing from which of the areas of collection

it had come. For this reason a type locality could not be given more closely, but on consideration of the area and the distribution of this new species, it has been decided that West Blakeley should be designated as the type locality. - Geographical position: West Blakeley, 30-23 fathoms; 48° 34' 30" N; 122° 50' 36" W.

## A. M. U.

The Meeting of the A. M. U. this year will be held in Ottawa, Ontario, Canada, from July 31 to August 4. Arrangements for the conference are in the hands of Dr. A. C. Clarke, Jr., First Vice President. For the various sessions rooms will be available at the National Museum of Canada and at Carleton University.

Principal officers for 1967 are: Dr. Leo G. Hertlein, President; Dr. Clarke, First Vice President; Mr. Gale G. Sphon, Second Vice President; Mrs. Margaret Teskey, Secretary and Mrs. H. B. Baker, Treasurer.

Members of the American Malacological Union, Inc. will receive details regarding the meeting directly from the central office. Non-members are invited to attend the meetings and may obtain details by writing to Mrs. Teskey in Marinette, Wisconsin.
